Prevention, identification and treatment of critical events in paediatric anaesthesia: “Out of APRICOT”

**IMPORTANT NOTICE: access is limited to pre-registered delegates**

Learning objectives:
Based on the recently published APRICOT study, this pre-congress course is aimed at building knowledge on identification and management of critical events in children undergoing anaesthesia.

The course includes the presentation of four interactive clinical cases followed by lectures providing up-to-date literature evidence and recommendations from experts in paediatric anaesthesia on early identification and treatments of critical events in children.

Target audience: Trainees, fellows and junior consultants with interest in paediatric anaesthesia.

Chair:
Nicola Disma (Genova, Italy)
Walid Habre (Geneva, Switzerland)
Francis Veyckemans (Lille, France)

A) Challenges in sedation outside the operating room
Francis Veyckemans (Lille, France)
Karin Becke (Nuremberg, Germany)
Torsten Lauritsen (Copenhagen, Denmark)
09:00 - 10:30

PBLD 1 - Child with severe OSAS undergoing MRI
Francis Veyckemans (Lille, France)

PBLD 2 - Analgesia and sedation in the emergency department
Karin Becke (Nuremberg, Germany)

PBLD 3 - Sedation in a child with severe learning
Torsten Lauritsen (Copenhagen, Denmark)

B. Keep the child haemodynamically stable
Walid Habre (Geneva, Switzerland)
Viviane Nasr (Boston, United States)
Andreas Machotta (Rotterdam, Netherlands)
11:00 - 12:30

PBLD 1 - Child undergoing craniosynostosis. Are we well prepared?
Andreas Machotta (Rotterdam, Netherlands)

PBLD 2 - Child with Fontan circulation undergoing non-cardiac surgery
Viviane Nasr (Boston, United States)

PBLD 3 - Scoliosis surgery in a child with Marfan syndrome
Walid Habre (Geneva, Switzerland)
12:30 - 13:30

Lunch break
### C) The paediatric airways

Nicola Disma (Genova, Italy)
Britta von Ungern-Sternberg (Perth, Australia)
John Fiaadjo (Philadelphia, United States)
