Ultrasound guided regional anaesthesia workshops

These half-day hands-on ultrasound workshops will focus on the basic skills in ultrasound techniques relevant to anaesthesiologists. Workshops include a short anatomical lecture followed by expert-led practice on living models and phantoms. After the session, participants will have acquired the basic skills in ultrasound-guided regional anaesthesia of the upper and lower limb and the trunk. The workshops will be run by the best available experts in ultrasound-guided regional anaesthesia from Spain, host country of Euroanaesthesia 2020.

Target audience: Residents, fellows, physicians interested in regional anaesthesia and chronic pain medicine.
