Ultrasound guided regional anaesthesia workshops

These half-day hands-on ultrasound workshops will focus on the basic skills in ultrasound techniques relevant to anaesthesiologists. Workshops include a short anatomical lecture followed by expert-led practice on living models and phantoms. After the session, participants will have acquired the basic skills in ultrasound-guided regional anaesthesia of the upper and lower limb and the trunk.

The workshops will be run by the best available experts in ultrasound-guided regional anaesthesia from Spain, host country of Euroanaesthesia 2020.

Target audience: Residents, fellows, physicians interested in regional anaesthesia and chronic pain medicine.

Ultrasound guided regional anaesthesia workshop (2) - Advanced upper limb blocks

**IMPORTANT NOTICE: access is limited to pre-registered delegates**

- **Chairs:**
  - Xavier Sala-Blanch (Barcelona, Spain)
  - Belen De José María (Barcelona, Spain)

- **Anatomical lecture**
  - Xavier Sala-Blanch (Barcelona, Spain)

- From the interscalene block to phrenic nerve sparing blocks: Suprascapular nerve block - Axillary nerve block
  - Tomás Cuñat (Barcelona, Spain)

- Supraclavicular BP block and upper trunk block
  - Jose Cros (Wolverhampton, United Kingdom)

- Proximal thoracic ESP block for shoulder and clavipectoral fascia block for clavicle
  - Juan Bernardo Schuitemaker (Barcelona, Spain)

- Proximal infraclavicular: Costoclavicular and retroclavicular BP blocks
  - Daniela Nieuwveld (Barcelona, Spain)

- Axillary BP block plus intercostobrachialis nerve block
  - Víctor Varela (Santiago, Chile)

- Rescue blocks of the upper limb
  - Carles Morros (Barcelona, Spain)
